UMAMI FLAVOR

Nutritional Benefits for Your Cat's Delight

Stimulates Appetite

This silky, easy-to-digest broth helps restore vitality and is more appealing to choosy cats, who don't mind trying new flavors and textures.

Natural & Delicious

Always free of grains, fillers, & iffy ingredients. No by-products, preservatives, and artificial colors/flavors.

Antioxidants

Vitamin E, which acts as an antioxidant, is essential to a cat's diet because it helps to protect cells from cell-damaging "free radicals". Green tea extract is especially high in antioxidants and helps, as well, to decrease fecal odor.

Increased Hydration

Provides extra hydration, a key factor in keeping your cat healthy.

Always Fresh

Delivered in innovative cups that provide an oxidative barrier to assure freshness without the use of preservatives.

Tasty Complements

Not only is our special broth easier to digest than dry foods, it also enhances the other food flavors your cat loves. The convenient assortment of cups adds a rich variety to any meal.

UMAMI Unleashed

Umami, a savory "fifth taste", is an amino glutamic acid derived naturally from bonito flakes and dashi. Your cat can experience a depth of all-natural ingredients.

High- Quality Protein

Your cat deserves to benefit from pure sources of protein. All of INABA's products consist of genuine deep-sea tuna and farm-raised chicken.

The Secret to Good Health & Good Taste

If you are looking to add new flavors to your cat's meal, you may want to consider incorporating dashi into their diet. Dashi is a traditional Japanese fish-based broth made from bonito flakes, known for its rich, savory flavor. Incorporating dashi into your cat's diet can add depth and complexity to their meals, making them more enjoyable.

The Making of Dashi Broth

1

The Tuna Harvest

Skipjack tuna is caught from the deep sea.

2

Drying Process

The tuna is transformed into a protein and mineral-rich dried bonito.

3

Flaking Process

The dried bonito is delicately shaved into bonito flakes.

4

Brewing Process

The bonito flakes are carefully brewed for several hours.

5

The Birth of the Golden Delicacy

It's not just about the taste - dashi can also provide important nutrients, including vitamins and minerals. Dashi, is low in calories and fat, making it a healthy addition to your cat's diet. It is also a broth-based ingredient, which means it contains a significant amount of moisture.

Overall, dashi can be a tasty and nutritious addition to your cat's meals, adding a burst of flavor that they're sure to love.

The Heart of Flavor

Our 200 - Year Journey

For over 215 years, INABA has remained dedicated to producing only the most genuine products for Japan's food industry.

Established in 1805 as a marine fish products business in Japan, INABA pioneered the commercialization of dried bonito. This beginning heralded a new journey towards providing thoughtfully crafted food products to the world.
