MAKE FEEDING YOUR HORSE EASY

- **Fibre**
Plays a critical role in a horse's digestive system. Horses need a minimum of 1.5% to 2% of their body weight in fibre per day.
- **Protein**
Is essential for muscle development, repair, and maintenance in horses.
- **Vitamins, Minerals and Amino Acids**
Supports the immune system, skeletal system, nervous system, and overall metabolism.
- **Salt**
Is important for maintaining hydration and electrolyte balance.
